## **Junior Backend Software Engineer (m/f/d)**

Berlin, full-time | Starting immediately

Car eWallet is driven by the vision to make self-driving cars truly autonomous by providing them with the ability to facilitate transactions on their own. To do so, Car eWallet is built on blockchain, turning it into one of the very first projects that makes use of this groundbreaking technology in a real-world setup.

On our way to change the way people will experience mobility, we are looking for a product-driven Junior Backend Developer to join our open-minded and agile team consisting of developers, product people, business developers, designers, researchers, and project managers.

As a Junior Backend Developer, you are a vital element of our team driving the implementation of our platform's core and use-case specific features. You bring along good knowledge in software development and a high readiness to learn new things and to solve challenging technological problems. You are excited to get involved in team discussions, enjoy sharing knowledge and discover new technological possibilities together with the team.

---

## Your responsibilities

- Actively develop further the Car eWallet platform and implement use case specific extensions to onboard new service providers to our network.
- Work with our technical development team on automated build creation, deployment and monitoring using tools like Jenkins, Docker, openshift, etc.
- Support and create continuous Integration and delivery pipelines for projects.
- Support and improve software testing.

## Your profile

- Completed studies in software engineering or applied computer science or comparable education. Experience in professional software development is a plus.
- Basic knowledge of development in object oriented programming with e.g. Java, Go etc. and advanced knowledge in Spring (boot) or similar frameworks.
- As a plus, experiences in Blockchain Technologies (e.g. Hyperledger Fabric).
- Ability to work in a team using agile methods like SCRUM.
- Solid knowledge of working with agile tools for project development (e.g. JIRA) and document management (e.g. Confluence).
- Good analytical skills, structured working style, initiative, organizational and team skills.
- Good command of spoken and written English, speaking German is a plus, willingness to travel.
- Basic Know-How of REST communication and distributed systems.

## Your benefits

- Competitive salary
- Free choice of hardware
- Young and dynamic start-up environment
- Team events (offsite, lunches, conferences, and more)
- Company events (hiking, holiday party, and more)
- Childcare and transportation allowance
- Flexible work hours and home office policy
- A great location in the very heart of Berlin
