

JOB POSTING

Senior Backend Software Engineer (m/f/d)

Berlin, full-time | Starting immediately

Car eWallet is driven by the vision to make self-driving cars truly autonomous providing them with the ability to facilitate transactions on their own. To do so, Car eWallet is built on blockchain, turning it into one of the very first projects that makes use of this groundbreaking technology in a real-world setup.

On our way to change the way people will experience mobility, we are looking for a product-driven Senior Backend Developer to join our open-minded and agile team consisting of developers, product people, business developers, designers, researchers, and project managers.

As a Senior Backend Developer, you are a vital element of our team driving the development and design of our platform's core and use-case specific features. You bring along well-founded experience in various aspects of systems engineering and development of decentralized applications and, thus, enrich our lively discussions with a strong opinion and an urge to build amazing software. You are excited to get involved with product planning, enjoy sharing knowledge and discover new technological possibilities together with the team.

JOB POSTING

Your responsibilities

- Shape the development of the Car eWallet platform and implement use case specific extensions to onboard new service providers to our network.
- Lead a small development team and support your teammates to solve day-to-day challenges.
- Contribute to the use of blockchain in the real world and on a large scale.
- Develop and implement testing strategies to drive code quality.
- Work with our technical development team on automated build creation, deployment and monitoring using tools like Jenkins, Docker, openshift, etc.
- Create concepts for software architecture and analyze and rate existing ones.
- Management of Incident- and Problem Management.

Your profile

- Completed studies in software engineering or applied computer science.
- Minimum five years of professional experience in software development.
- Very profound knowledge of development in object oriented programming with e.g. Java, Go etc. and advanced knowledge in Spring (boot) or similar frameworks.
- Experiences in Blockchain Technologies (e.g. Hyperledger Fabric) is as a plus.
- Good analytical skills combined with a comprehensive understanding of development processes.
- High assertiveness with moderation and communication skills as well as the ability to work in an agile team (method SCRUM using tools like JIRA, Confluence and Bitbucket).
- Structured working style, initiative, organizational and team skills.
- Very profound knowledge of Container Technologies, PaaS, Cloud infrastructure or microservices.
- Very profound knowledge of object-oriented design patterns (UML or similar modeling languages).
- Good command of spoken and written English, Speaking German is a plus, willingness to travel.
- A confident and reliable appearance in contact with customers and suppliers.

JOB POSTING

Your benefits

- Competitive salary
- Free choice of hardware
- Young and dynamic start-up environment
- Team events (offsite, lunches, conferences, and more)
- Company events (hiking, holiday party, and more)
- Childcare and transportation allowance
- Flexible work hours and home office policy
- A great location in the very heart of Berlin

Prerequisites

A valid work permit and residence permit in Germany are prerequisites to apply. We cannot support any Visa application process.
