

JOB POSTING

Senior Backend Software Engineer (m/f/d)

Berlin, full-time | Starting immediately

Car eWallet is driven by the vision to make self-driving cars truly autonomous providing them with the ability to facilitate transactions on their own. To do so, Car eWallet is built on blockchain, turning it into one of the very first projects that makes use of this groundbreaking technology in a real-world setup.

On our way to change the way people will experience mobility, we are looking for a product-driven Senior Backend Developer to join our open-minded and agile team consisting of developers, product people, business developers, designers, researchers, and project managers.

As a Senior Backend Developer, you are a vital element of our team driving the development and design of our platform's core and use-case specific features. You bring along well-founded experience in various aspects of systems engineering and development of decentralized applications and, thus, enrich our lively discussions with a strong opinion and an urge to build amazing software. You are excited to get involved with product planning, enjoy sharing knowledge and discover new technological possibilities together with the team.

JOB POSTING

Your responsibilities

- Shape the development of the Car eWallet platform and implement use case specific extensions to onboard new service providers to our network
- Lead a small development flock and support your teammates to solve day-to-day challenges
- Contribute to the use of blockchain in the real world and on a large scale
- Develop and implement testing strategies to drive code quality
- Work with our technical operations team on automated deployment and monitoring using Jenkins, Docker, etc.

Your profile

- Completed studies in software engineering or applied computer science.
- Minimum three years of professional experience in software development.
- Very good knowledge of development with Java EE and the corresponding frameworks (Spring and Hibernate)
- As a plus, experiences in permission-based Blockchain Technologies (e.g. Hyperledger Fabric)
- Good analytical skills combined with a comprehensive understanding of development processes
- High assertiveness with moderation and communication skills as well as the ability to work in an agile team
- Structured working style, initiative, organizational and team skills
- Good command of spoken and written English, willingness to travel. Ability to converse in German is a bonus.
- A confident and reliable appearance in contact with customers and suppliers.
- An impressive Github repository or a huge record of contributions on Stackoverflow can compensate for shortcomings and, of course, are a good bonus.

Your benefits

- Competitive salary and pension, with regular compensation reviews
- Free choice of hardware
- Young and dynamic start-up environment
- Team events (offsite, lunches, conferences, and more)
- Company events (hiking, holiday party, and more)
- Childcare and transportation allowance
- Home office policy
- A budget for conferences, education, and books

JOB POSTING

- Home office policy
- Flexible work hours
- A great location in the very heart of Berlin

Prerequisites

A valid work permit and residence permit in Germany are prerequisites to apply. We cannot support any Visa application process.

Please send your complete job application including your CV, motivation letter and work examples to jobs@car-ewallet.de.
